

Turn WHS Calculator into an App

On an iPhone, browse to the calculator using Safari, then with it displaying you will see the 'share' icon at the bottom of the screen that looks like a square with an arrow pointing out the top, as in this example:

Touch to select this icon, then scroll down till you see 'Add to Home Screen'. You are then given an opportunity to name the App, for example 'WHS Calculator' before hitting 'Add'. A shortcut icon then appears on the iPhone desktop just as if it were an App, as in the example below:

This process is very similar on Android phones: Launch Chrome, browse to the calculator, tap the **menu** icon (3 dots upper right) and tap 'Add to Homescreen'. Enter a name for the shortcut as above.
